Fund Value Details

- **Computation of Net Asset Value (NAV)**

The NAV will be computed as per IRDAI (Insurance Products) Regulations, 2024.

The NAV for a particular fund shall be computed as: Market Value of investment held by the fund plus the value of current assets less the value of current liabilities and provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before creation/redemption of units), gives the unit price of the fund under consideration.

In case the valuation day falls on a holiday/non business day, then the exercise will be done on the following working day.

We reserve the right to value less frequently than daily in extreme circumstances, where the value of the assets may be too uncertain. In such circumstances we may defer the valuation of assets for up to 30 days until the company feels that the certainty as to the value of assets has been resumed. The deferment period of the valuation of assets will be with prior consultation with IRDAI.

- **Allocation of Units**

The Company applies premiums after deducting Premium Allocation Charge if any along with GST, to allocate Units in one or more of the Unit linked funds in the proportion which the policyholder specifies. The allotment of units to the policyholders will be done only after the receipt of premium proceeds as stated below;

In case of New Business, units shall only be allocated on the date of the proposal is completed and results into a Policy by the application of money towards premium.

In the case of renewal premiums, the premium will be adjusted on the due date, even if it has been received in advance. (This assumes that the full stipulated premium is received on the due date.)

Renewal premiums received in advance will be kept in the deposit account and will not earn any returns until the renewal premium due date on which the same will be applied to the unit funds.

- **Redemptions**

In respect of valid applications received (e.g. surrender, switching, etc.) up to 3.00 p.m. by the company, the same day's closing unit price shall be applicable. In case of a holiday or non-business day the closing unit price of the next business day shall be applicable.

In respect of valid applications received (e.g. surrender, switching, etc.) after 3.00 p.m. by the company, the closing unit price of the next business day shall be applicable.

The unit price for each segregated fund provided under this product shall be made available to the public on a daily basis. The unit price will also be displayed in the web portal of the Company.

- **Cancellation of units**

To meet fees and charges except Premium Allocation Charge and FMC and to pay benefits, the Company will cancel the units to meet the amount of the payments which are due. If units are held in more than one Unit Linked Fund, then the Company will cancel the units in each fund to meet the amount of the payment. The value of units cancelled in a particular fund will be in the same proportion as the value of units held in that fund is to the total value of units held across all funds. The units will be cancelled at the prevailing unit price.

The FMC will be priced in the unit price of each Fund on a daily basis.

- **Policy Fund Value**

The value of your Policy fund at any time is the total value of units at that point of time in a segregated fund i.e. total number of units under a Policy multiplied by the Net Asset Value (NAV) per unit of that fund. If you hold units in more than one Unit Linked Fund, then the value of the fund is the total value across all Unit Linked Funds.
